-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's request for reconsideration filed 08/21/07 has been entered and carefully considered. However, limitations of the claims (1, 4, 6, 7, 9, 12, 14, 15, 17, 20, 22-23, 25, 28, 30, 31 and 33-48) have not been found to be patentable over newly discovered prior art, therefore, these claims are rejected under the new ground of rejection as set forth below.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 17, 20, 22-23 and 41-44 are rejected under 35 U.S.C. 101 because the claimed invention appears to be directed to non-statutory subject matter. The claims lack the necessary physical articles or objects to constitute a machine or a manufacture within the meaning of 101. They are clearly not a series of steps or acts to be a process nor are they a combination of chemical compounds to be a composition of matter. As such, they fail to fall within a statutory category. They are, at best, functional descriptive material *per se*.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

**Office action:**

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4, 6, 7, 9, 12, 14, 15, 17, 20, 22-23, 25, 28, 30, 31 and 33-48 are rejected under 35 U.S.C. 102(e) as being anticipated by Goodman et al. [US. 2006/0059253].

**As per claims 1, 9, 17, 25, 37, 38, 41, 42, 45, and 46,** Goodman et al. teaches a computer implemented method and corresponding system for producing a graphical user interface, comprising the steps/means:

storing a graphic file created by a multi-layered type computer program (page 2, 0020-0022), the graphic file containing a list of control objects, wherein each control object is in at least one layer, dictates at least one attribute of a control element and is editable by a user (page 25, 0314-0321);  
creating an application program other than the multi-layered type computer program to access the graphic file and to display a control element from the graphic file on the graphical user interface (page 32, 0389), the control element

having at least one attribute dictated by one of the control objects in the at least one layer of the graphic file (page 34, 0417) the control element independently editable relative to a different control element (page 37, 0452).

**As per claims 4, 12, 20, 28, 39, 43, and 47,** Goodman et al. teach the at least one layer of the first control object being grouped with the other layers in the graphic file (page 34, 0417-0420).

**As per claim 6, 14, 22, and 30,** Goodman et al. disclose the control element being an edit control to manipulate a time-based stream of information (0551-0553).

**As per claims 7, 15, 23, and 31,** Goodman et al. teach the at least one attribute being at least one of an appearance and location and or size and element type and state and function and behavior in a particular environment (page 37, 0451-0452).

**As per claims 33-36, 40, 44, and 48,** Goodman et al. teach the layers being linked (page 22, 0279-0282).

### **Response to Arguments**

Applicant's arguments with respect to claims 1, 9, 17, 25, 37, 41 and 45 have been considered but are moot in view of the new ground of rejection.

BA HUYNH  
PRIMARY EXAMINER

A handwritten signature of "BA HUYNH" is written over a stylized, abstract line drawing. The drawing consists of several intersecting and overlapping curved and straight lines, creating a complex, geometric pattern. The signature is placed within this pattern, with "BA HUYNH" above "PRIMARY EXAMINER".
